INSTALLED CAPACITY

329 TON

ANNUAL CO_2 REDUCTION

655 PCS

MONOCRYSTALLINE SOLAR PANELS

Holiday Inn San Luis Potosí Quijote is a full service IHG hotel with 277 rooms, 10 meeting rooms and landscaped gardens. It is one of the leading venues for business travel, conventions and events in San Luis Potosí.

Our latest turnkey EPC project brings clean energy to one of the best known hotels in San Luis Potosí. Using 655 monocrystalline panels, mostly N-type bifacial modules, and Growatt inverters, our team delivered a 419 kWp rooftop system across all hotel wings. It is capable of producing 750 MWh annually, covering 89% of the hotel's consumption and reducing CO_2 emissions by 329 tons per year. The project also includes EV chargers for hotel guests and employees.

Solar Modules	Renesola RS5J-640NBG-E1
Inverters	Growatt MAX 70KTL3-XL2
Sustainability	89 %
Warranty	15 years
