MONOCRYSTALLINE SOLAR PANELS

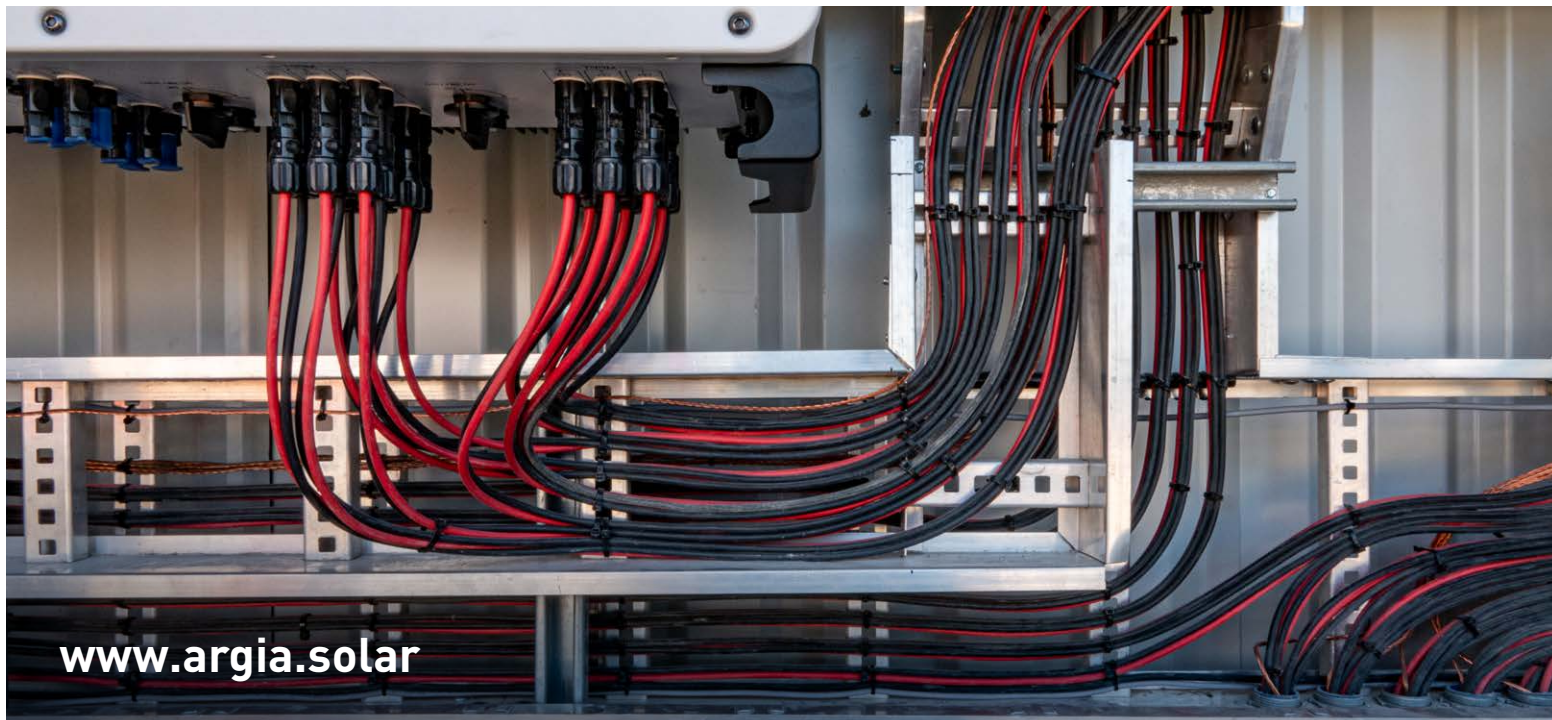

Plastic Omnium Mexico is a leading manufacturer of automotive components, specializing in innovative lighting solutions and advanced energy systems. With a strong commitment to sustainability and quality, they deliver cutting-edge products that enhance vehicle performance while meeting global industry standards.

Our latest project for Plastic Omnium Mexico showcases exceptional energy efficiency and sustainability benefits. With 882 monocrystalline solar panels installed, each generating 700 W, the system delivers a PV capacity of 617,4 kWp, powered by high-efficiency inverters. This setup achieves an impressive annual production of 882 MWh, preventing 440 tons of CO₂ emissions per year, underscoring our commitment to innovative and environmentally friendly energy solutions.

Solar Modules	Canadian Solar, CS7N-700TB-AG
Inverters	Growatt MAX 124KTL3
Energy Independence	3 %
Warranty	25 years
